11:45 A.M. 5K FU16/FU18/FU20/FSR/FMA/Open
All Classic, Interval start. 10K is 2 laps of 5K course
Event Website

Forecast/Conditions: Friday night a chance of rain or freezing rain, freezing drizzle and drizzle with a low around 32. Saturday a chance of drizzle with race temperatures 39 to 42. Expect tracks to become wet and slowly transform and/or glaze.

Glidewax: Apply LF Blue/LF Black mixed 1:1, scrape and brush, then apply HF Yellow, scrape and brush. Topcoats are not allowed in CXC JNQ Classic races, so no JetStream for this race.

Gripwax: Roughen base with 150 grit sandpaper, apply Nordic Base Klister Green, smooth, let cool. Then apply 1 layer of Nordic Klister Yellow, smooth, let cool. If using skin skis, see our skin treatment options for best results.

Structure: A universal grind covered by one pass with the Yellow Structurite tool followed by one pass with the Blue Structurite tool will best suit these conditions.

Created by Michael Young, Toko Tech Team member since 2005.

Check the Wax Tips page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
