WAX RECOMMENDATION

Finn Sisu Sprints

Theo Wirth Park, Minneapolis, MN
Friday, February 3
6 P.M. to 8 P.M.
O.6K Skate
Single loop
More info here

Forecast/Conditions: Friday daytime high of 23, dropping into the high teens for these sprints. Slight wind from the west. The sprints will be run on heavily worked manmade snow. Expect the course to start out firm and deteriorate throughout the event.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Structure: A universal structure covered by one pass with the Red Structurite tool followed by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

Racing - Service

Check the Wax Tips page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
