

WAX RECOMMENDATION

ABC Invitational Relays

Theo Wirth Park, Minneapolis, MN

Saturday, January 16

10 A.M. Boys, 11:30 A.M. Girls

4 X 3K relays: 2 Classic and 2 Skate skiers

Mass Start

Single loop per skier

Forecast/Conditions: Expect a firm track, icy in spots, for the Boys race, becoming softer with chopped uphill and glazed classic tracks. Friday evening lows in the low 20s with race temperature in the mid-20s for Boys and upper 20s for Girls. Mostly sunny with a slight wind.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Red, scrape and brush. Finish by rotocorking JetStream Red, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Carbon BaseWax Green, cork smooth, let cool. Then apply several layers of Carbon GripWax Yellow, corking between layers. Early skiers may wish to cover the Yellow with Carbon Gripwax Viola

Structure: A universal grind covered by one pass with the Red TOKO Structurite tool (old medium offset wheel) before JetStream application will best suit these conditions.

Racing - Service

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
