Anchorage Cup Kincaid Freestyle

Kincaid Park, Anchorage, AK
Sunday, February 9
Noon
15K, 10K, 3K, Free technique
Mass start
2-3 Laps
www.anchoragenordicski.com/amh-anchorage-cup-series/

Forecast/Conditions: Overnight low 27 with a 40 percent chance of new snow. Temperature at start 32, freshly groomed new snow, clean and very high humidity. A 40 percent chance of new precipitation during race, most likely snow. Wind 5-10 mph with occasional stronger gusts.

Glidewax: Apply Performance Black Hot Wax, scrape and brush, then apply High Performance Yellow Hot Wax, scrape & brush. For HP Liquid Paraffin, apply Performance Blue Hot Wax, scrape & brush, then spray on HP Liquid Yellow, let sit in a warm room for at least one hour (overnight is best), polish with the Polishing Brush Liquid Paraffin.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Apply 2 alternating layers each of Nordic GripWax Red and Yellow, corking between layers. Finish with Yellow.

Structure: A coarse universal structure covered by one pass with the Red Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions. The new snow will act colder than it really is.

Check the Wax Tips page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
