

WAX RECOMMENDATION

Blueberry Hills Classic

Blueberry Hills Trails, Deer River, MN

Sunday, January 3

1 P.M.

10K Classic

Forecast/Conditions: Expect very good classic skiing conditions, with a firm track. Saturday evening low temperature expected to -20 F with temperatures rising to 5 F by race time. Slight breeze and mostly sunny.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Blue, sprinkle on Nordlite Powder X-cold, iron in together, scrape and brush. Finish by rotocorking JetStream Blue, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Carbon BaseWax Green, cork smooth, let cool. Then apply layers of Carbon GripWax Mint, corking between layers. Skiers in the back half or those desiring more kick might substitute Carbon White for Mint.

Structure: A fine linear grind covered by one pass with the Blue TOKO Structurite tool (old fine-linear wheel) before HF Blue/X-cold powder application will best suit these conditions.

Racing - Service

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
