

WAX RECOMMENDATION

Honey Bear Classic

Big Bay Pathway, Big Bay, MI

Saturday, February 27

Noon

15K/30K Classic

Mass start

Forecast/Conditions: Overnight low around 17 rising to 27 at start. Gusty winds off of the lake and cloudy skies will keep the snow from transforming quickly. Fresh snow in the days leading up to the race will be packed and tracked. Expect track to be soft to moderately firm.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Red, scrape and brush. Finish by rotocorking JetStream Red, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Carbon BaseWax Green, cork smooth, let cool. Then apply 3-4 layers of Carbon GripWax Yellow, corking between layers. Those wishing to have a freer ski can apply 1-2 layers of Red covered by shorter layers of Yellow.

Structure: A universal grind covered by one pass with the Red TOKO Structurite tool (old medium offset wheel) before JetStream application will best suit these conditions.

Racing - Service

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
