

WAX RECOMMENDATION

Lumberjack Jaunt

Northland Arboretum, Brainerd, MN

Sunday, January 31

11 A.M. 16K Classic and 16x16 Continuous Pursuit

11:30 A.M. 6K Classic and 6x6 Continuous Pursuit

Noon 6K/16K Freestyle

Forecast/Conditions: Expect pretty decent track conditions with the 2 to 3 inches of new snow they received Sunday and Monday. Expect Saturday night's low around -8F, with race time temperature in the low to mid single digits above zero.

Glidewax: Apply LF Moly/LF Blue mixed 1:1, scrape and brush. Then apply HF Blue, sprinkle on Nordlite Powder X-cold, iron in together, scrape and brush. Finish by rotocorking JetStream Blue, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Carbon BaseWax Green, cork smooth, let cool. Then apply several layers of Carbon Mint, corking between layers. Those needing extra kick should use Carbon White.

Structure: A fine linear grind covered by one pass with the Blue TOKO Structurite tool (old fine-linear wheel) before JetStream application will best suit these conditions.

Racing - Service

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
