

WAX RECOMMENDATION

Sawtooth International

Pincushion Trails, Grand Marais, MN

Sunday, January 10

10 A.M. 10K Classic

11 A.M. 20K Skate

10K lap

Mass start

Forecast/Conditions: Expect excellent ski conditions on this intermediate level course. Saturday evening lows in the high single digits, while race time temperature should be in the low teens. Mostly sunny with a slight breeze.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Blue, scrape and brush. Finish by rotocorking JetStream Blue, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Carbon BaseWax Green, cork smooth, let cool. Then apply several layers of Carbon GripWax White, corking between layers. For those who desire more kick, cover with Carbon Blue.

Structure: A fine linear grind covered by one pass with the Blue TOKO Structurite tool (old fine-linear wheel) before JetStream application will best suit these conditions.

Racing - Service

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
