

# WAX RECOMMENDATION

## Seeley Hills Classic

Birkie Trail at OO, Seeley, WI

Saturday, January 16

10 A.M.

22K/42K Classic

**Forecast/Conditions:** Expect a firm glazing track with fine, slightly transformed snow. Friday evening low in the mid-teens with race start temperature around 20. Temperature will rise into the high 20s with mostly sunny skies.

**Glidewax:** Apply LF Moly, scrape and brush, then apply HF Red, scrape and brush. Finish by rotocorking JetStream Red, brush with a dedicated nylon polishing brush and polish with a thermopad.

**Gripwax:** Roughen base with 150 grit sandpaper, iron in Carbon BaseWax Green, cork smooth, let cool. Then apply several layers of Carbon GripWax Red, corking between layers. Cover with a few thin layers of Carbon Gripwax Viola.

**Structure:** A universal grind covered by one pass with the Red TOKO Structurite tool (old medium offset wheel) before JetStream application will best suit these conditions.

Racing - Service

Check the WaxTip page at [www.TokoUS.com](http://www.TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
