

WAX RECOMMENDATION

Midwest JOQ, High School, Citizen Race

Mt. Itasca, Coleraine, MN

Saturday, January 16

1.2K Skate sprints

9:30 A.M. Qualification round

11:30 A.M. Elimination heats

Forecast/Conditions: Expect a freshly groomed, hard pack of transformed, mostly natural snow. Much less manmade snow in the mix this year than in a typical year for this venue. Friday evening low in the high teens, rising to near 20 for Qualification round and high 20 s by the Heats. Partly sunny with a slight breeze from the south.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Red, scrape and brush. Finish by rotocorking JetStream Red, brush with a dedicated nylon polishing brush and polish with a thermopad.

Structure: A universal grind covered by one pass with the Red TOKO Structurite tool (old medium offset wheel) before JetStream application will best suit these conditions.

Racing - Service

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
