

WAX RECOMMENDATION **TOKO**[®]

Alpenglow 10K and 20K - Updated!

Tahoe XC, Tahoe City, CA

Sunday, February 25

10 A.M.

10K or 20K

Mass start

1 loop per distance

<http://tahoexc.org>

Forecast/Conditions: Overnight low 27, temperature at race start 39 with a high of 45. Clean, mostly transformed, and some transforming snow. Light winds and partly cloudy on race day.

Glidewax: Apply HP Blue Hot Wax, scrape and brush, then spray on HP Liquid Paraffin Red, let stand at least 2-4 hours, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Blue Hot Wax, scrape and brush, then apply HP Red Hot Wax, scrape and brush.

Gripwax: N/A

Structure: A universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax or before spraying HP LP will best suit these conditions.

Created by Ben Grasseschi, Toko Tech Team member since 2003.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
