

WAX RECOMMENDATION TOKO®

Bring Back Biathlon

Jug Mountain, McCall, ID

Saturday, February 24

Noon Practice, 2:30 P.M. Race start

5K Skate, 3 laps

Interval Start

<https://www.mccallnordic.com/racing/remastered/>

Forecast/Conditions: Warm days with freezing nights toward the end of the week. Friday night forecasted low of 22, Saturday high and start temperature around 40 and sunny. Expect the course to become soft and glazed with skier traffic. There will also be some tree sap/debris which can slow ski glide.

Glidewax: Apply High Performance Blue Hot Wax, scrape and brush. Sprinkle on HP Powder Yellow, iron in, let cool, scrape and brush. If you do not have HP Powder, apply BP Blue Hot Wax, scrape and brush, then apply HP Yellow Hot Wax, scrape and brush. A warm-up set of skis and a race set of skis is not a bad idea to reduce the effect of dirt build-up. If you choose this route, use the above recommendation for the warm-up pair and the following for the race pair: Apply HP Blue Hot Wax, scrape and brush, spray on HP Liquid Paraffin Yellow, let stand overnight, then polish with the Polishing Brush Liquid Paraffin.

Structure: A universal structure covered by one pass with the Yellow Structurite tool after scraping and brushing the final Hot Wax or before spraying HP Liquid will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](#) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](#).
