

WAX RECOMMENDATION TOKO®

Oosik Classic Race and Tour

Denali Nordic Ski Club Trails, Talkeetna, AK

12PM Saturday, March 9, 2024

50K/25K/10K, Classic technique

Mass start, Point to Point race

<https://www.denalinordicskiclub.org/oosik-ski-race/>

Forecast/Conditions: Overnight low around 11F. Temperature at start 25F, 5mph wind. Machine groomed, clean old snow. Should not have significant glazing thanks to drying wind. Mostly cloudy

Glidewax: Apply High Performance Blue Hot Wax, scrape and brush. Sprinkle on HP Powder Red, iron in, let cool, scrape and brush. If you do not have HP Powder, apply BP Blue Hot Wax, scrape and brush, then apply HP Red Hot Wax, scrape and brush.

Gripwax: See the TOKO tent at the race start for updates. Roughen base with 150 grit sandpaper, apply Nordic Base Klister Green for the 50k. Then apply 1 layer of Nordic GripWax Yellow, covering and not mixing with 3 layers of Nordic GripWax red, corking between layers. Shorter races the same grip combo but may use Nordic Base Wax Green instead of a Klister Binder

Structure: A medium Universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax/Powder will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
