

# WAX RECOMMENDATION TOKO®

## Washington Biathlon Association Race 9

Stevens Pass Nordic Center, Stevens Pass, WA

Sunday, April 7

10:30 A.M. Zeroing, 11:30 A.M. Race

Mixed Relay

Barbeque to follow

<http://www.washingtonbiathlon.org>

**Forecast/Conditions:** Overnight low of 32 rising to 45 by the end of the race. A 65 percent chance of an early morning mix of rain/snow expected to taper off by race time with partly sunny skies predicted for around noon. This is a fun event so brush out Saturday's race skis and reapply the HP LP Yellow like yesterday.

**Glidewax:** Apply High Performance Red Hot Wax, scrape and brush. Spray on High Performance Liquid Paraffin Yellow, let stand for at least 2 hours, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Red Hot Wax, scrape and brush, then apply HP Yellow Hot Wax, scrape and brush.

**Gripwax:** N/A

**Structure:** A universal or wet structure covered by one pass with the Yellow Structurite tool after scraping and brushing the final Hot Wax or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](http://TokoUS.com).
