

WAX RECOMMENDATION

RE-MASTERED

Ponderosa State Park, McCall, ID - Saturday, Jan 18

10 A.M., 40k/30k/10k, Skate

Mass start, 1-4 laps

<https://www.mccallnordic.com/racing/remastered/>

Forecast/Conditions: Friday night low of 13 degrees with a 20 percent chance of snow. Saturday sunny with a race start temperature around 15 and a high of 25 degrees. (It's not uncommon for night temperatures to be lower than forecasted.) Course will be PistenBully groomed Friday night and is expected to be clean, firm and fast.

Glidewax: Apply Base Performance Blue Hot Wax, scrape and brush then apply HP Blue Hot Wax, sprinkle on X-Cold Powder, iron in together, let cool, scrape and brush.

Gripwax: n/a

Structure: A fine structure covered by one pass with the Blue Structurite tool after scraping and brushing the final Hot Wax will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
