**Blackhawk Ski Club, Middleton, WI - Saturday, March 1**

9 A.M. Zero, 10 A.M. Race, various distances, Skate  
Mass/Interval start TBD – multiple laps

<https://www.webscorer.com/register?raceid=379017>

---

**Forecast/Conditions:** High temperatures this week will take a toll on the snow but Friday night's low will be around 20. The air will warm quickly to be in the mid- to high 20s by race time, but the snow will warm slower with a temperature in the mid-20s by race time. Expect a firm deck of transformed snow to break down slowly with lap traffic and the warming sun.

**Glidewax:** Apply BP Red Hot Wax, scrape and brush, then apply HP Red Hot Wax, scrape and brush. Sprinkle on [Jet Powder](#) Red, make two passes with iron at 180c, let cool, scrape and brush. Polish with a merino wool roller. Then spray on [Jet Liquid](#) Red, let the ski dry flat for at least 20 minutes. No need to brush or polish Jet Liquid before skiing.

**Gripwax:** n/a

**Structure:** A universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax or Jet Powder but before applying Jet Liquid will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Blue, Red or Yellow), as the temperature ranges are the same. For a more economical option, omit Jet topcoats. All Race Wax Tips recommend ONLY fluorine-free products. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
