

WAX RECOMMENDATION

SKI RENNAN/WASHINGTON NORDIC CUP #4

Icicle Creek Fish Hatchery, Leavenworth, WA – Sunday, Feb 9

10:45 A.M., 5k Open followed by 2K, 1k and Lollipop, Freestyle

Wave starts

<http://www.skileavenworth.com>

Forecast/Conditions: Overnight low of 17 rising to 29 at the start and 34 at the finish. Snowpack has been improved with an additional snowfall of 5 inches Tuesday for a total base of 14 inches. Expect some areas with some dirt mixed in with the old mostly transformed snowpack. A 40 percent chance of snow flurries during the event under mostly cloudy skies.

Glidewax: Apply BP Red Hot Wax/BP Yellow Hot Wax mixed 1:1, scrape and brush, keeping things simple and affordable as the WNC Rules suggest.

Gripwax: NA

Structure: A universal structure covered by one pass with the Yellow Structurite tool after scraping and brushing the final Hot Wax will best suit these conditions.

Created by David Ford, Toko Tech Team member since 2003

Racing-Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
