

WAX RECOMMENDATION

RASC GAMEHAVEN LOOPY LOPPET

Gamehaven Nordic Trails, Rochester, MN – Saturday, Feb 15

10 A.M., 10k/5k, Skate and Classic

Wave starts – 2.5k laps

<https://www.rasc-mn.org/gamehaven-loopy-loppet>

Forecast/Conditions: Two to five inches of new snow on Friday followed by an overnight low of 17, rising to 20 at the start. A 30 percentage chance of snow leading up to and during the race. Mostly cloudy with winds of 10-15 mph gusting to 25. Expect a firm racing platform of transformed natural snow mixed with manmade snow, covered with new snow windblown in places.

Glidewax: Apply BP Blue Hot Wax, scrape and brush, then apply HP Red Hot Wax, sprinkle on X-Cold Powder, iron in together, scrape and brush. Sprinkle on [Jet Powder](#) Red, make two passes with iron at 180c, let cool, scrape and brush. Polish with a merino wool roller. Then spray on [Jet Liquid](#) Red, let the ski dry flat for at least 20 minutes. No need to brush or polish Jet Liquid before skiing.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 2-4 layers of Nordic GripWax Red, corking smooth between layers.

Structure: A fine structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax or Jet Powder but before applying Jet Liquid will best suit these conditions.

Racing-Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Blue, Red or Yellow), as the temperature ranges are the same. For a more economical option, omit Jet topcoats. All Race Wax Tips recommend ONLY fluorine-free products. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
