

WAX RECOMMENDATION

WASHINGTON BIATHLON ASSN RACE WEEKEND #2

Stevens Pass Nordic Center, Stevens Pass, WA – Saturday, Feb 8

10:30 A.M. Zero, 11:30 A.M. Race, Freestyle

Sprint Format, 10K Men, 7.5K Women/Juniors

<http://www.washingtonbiathlon.org>

Forecast/Conditions: Overnight low of 16 rising to 29 by race completion. Deep snowpack with more new snow added early in the past week. A 60 percent chance of light snow expected to fall during the event. A firm clean snowpack should yield some great skiing this weekend under partly cloudy skies.

Glidewax: Apply HP Red Hot Wax, scrape and brush, spray on HP Liquid Paraffin Yellow, let stand at least 2 hours, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP, apply BP Red Hot Wax, scrape and brush, then apply HP Yellow Hot Wax, scrape and brush.

Gripwax: NA

Structure: A universal structure covered by one pass with the Yellow Structurite tool after scraping and brushing the final Hot Wax will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
