

# WAX RECOMMENDATION

## CHISHOLM SATELLITE WOMEN'S DAY

Black Mountain, Rumford, ME - Saturday, March 8

8 A.M.

Ski day event

<https://nensa.net/event/chisholm-satellite-womens-day/>

---

**Forecast/Conditions:** Mostly cloudy conditions expected on Saturday with moderate winds. Conditions should be well-groomed transformed snow. Overnight low 22 at 8 A.M., the temperature will rise to 29 later in the day.

**Glidewax:** Apply BP Blue Hot Wax, scrape and brush, then apply HP Red Hot Wax, scrape and brush. Sprinkle on [Jet Powder](#) Red, make two passes with iron at 180c, let cool, scrape and brush. Polish with a merino wool roller. Then spray on [Jet Liquid](#) Red, let the ski dry flat for at least 20 minutes. No need to brush or polish Jet Liquid before skiing.

**Gripwax:** Roughen base with 150 grit sandpaper, heat in Nordic Base Klister, cork or rub smooth, let cool. Then apply a layer of Nordic Klister Red in a chevron pattern, rub smooth and let cool. If the snow is colder, alternate Nordic Klister Red and Nordic Klister Blue in a chevron pattern.

**Structure:** A universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax or Jet Powder but before applying Jet Liquid will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](https://TokoUS.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Blue, Red or Yellow), as the temperature ranges are the same. For a more economical option, omit Jet topcoats. All Race Wax Tips recommend ONLY fluorine-free products. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](https://TokoUS.com).
