Mass start, 2 Classic and 2 Skate skiers for each relay team

<https://www.skinnySKI.com/racing/highschool/2025/abcrelays-form.pdf>

---

**Forecast/Conditions:** Overnight low of 1 F, remaining in the low to mid-single digits F for both races. Surface wind of 10-15 mph will keep the snow dry, especially in the open area at the end of each lap. Up to two inches of snow is expected on Thursday and Friday which will allow the groomers to cover bare spots and work the new snow into the old, transformed snow.

**Glidewax:** Apply HP Blue Hot Wax, sprinkle on X-Cold Powder, iron in together, scrape and brush.

**Gripwax:** Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 2-3 layers of Nordic GripWax Red, corking smooth between layers. After allowing the Red to cool, apply a final layer of Nordic GripWax Blue, cork smooth and go ski.

**Structure:** A fine or universal structure covered by one pass with the Blue Structurite tool after scraping and brushing the final Hot Wax will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](#) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Blue, Red or Yellow), as the temperature ranges are the same. For a more economical option, omit Jet topcoats. All Race Wax Tips recommend ONLY fluorine-free products. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
