

WAX RECOMMENDATION

VASALOPPET USA SKATE

Vasaloppet Trails, Mora, MN – Saturday, Feb 7

9:30 A.M., 51k, Freestyle. Later Freestyle races of 34k/12k

Mass starts, 3, 2 or 1 lap(s)

<https://vasaloppet.us/race-weekend/>

Forecast/Conditions: Overnight low of 2F rising to 9F at 9:30 A.M. and 18 for the start of the last race. Mostly cloudy with a slight wind from the south. Expect a solid racing platform with occasional icy spots or loose snow, but generally in very good condition. With heavy traffic the transformed snow should glaze and become fast.

Glidewax: Apply HP Blue Hot Wax, scrape and brush, sprinkle on [Jet Powder](#) Blue, make two passes with iron at 180c, let cool, scrape and brush using the copper brush and polish with a merino wool roller. Then quickly (2 to 3 seconds) spray [Jet Liquid](#) Blue tail to tip, let sit for 10 minutes and go ski.

Structure: A fine or universal structure covered by one pass with the Blue Structurite tool after scraping and brushing the final Hot Wax or polishing the Jet Powder but before applying Jet Liquid will best suit these conditions.

Racing-Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Blue, Red or Yellow), as the temperature ranges are the same. For a more economical option, omit Jet topcoats. All Race Wax Tips recommend ONLY fluorine-free products. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
