

# WAX RECOMMENDATION

## LONG HAUL LOPPET

Jackson XC Ski Center, Jackson, NH – Sunday, March 8

9 A.M., 22k, 12.6k, or 8k

Freestyle and Classic

<https://www.skireg.com/long-hall-loppet>

---

**Forecast/Conditions:** Overnight temperature 50 with some rain, cooling down to 46 by the start. Mostly sunny conditions in high 40s. Snow will be transformed wet snow, glazed, and well-groomed but should break down quickly.

**Glidewax:** Apply HP Yellow Hot Wax, scrape and brush, sprinkle on Jet Powder Yellow, make two passes with iron at 180c, let cool, scrape and brush using the copper brush and polish with merino wool roller. Then quickly (3 - 4 seconds) spray [Jet Liquid Yellow](#) tail to tip, let sit for 10 minutes, and go ski.

**Gripwax:** Roughen base with 150 grit sandpaper, apply Nordic Base Klister Green, heat and smooth. While still warm, apply Nordic Klister Yellow in chevron pattern, smooth and let cool.

**Structure:** A wet structure covered by one pass with the Yellow Structurite tool after scraping and brushing the final Hot Wax or polishing the Jet Powder but before applying Jet Liquid will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](https://www.toko.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Blue, Red or Yellow), as the temperature ranges are the same. For a more economical option, omit Jet topcoats. All Race Wax Tips recommend ONLY fluorine-free products. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
