

WAX RECOMMENDATION

EASTERN U16 CHAMPIONSHIPS MIXED RELAY

Oak Hill Outdoor Center, Hanover, NH – Sunday, March 15

10 A.M., 4 x 3.3k, Classic/Freestyle

Wave start, 2 x 1.5k laps

<https://nensa.net/u16-championships/>

Forecast/Conditions: Overnight low of 18, 23 at start, partly cloudy skies with a daytime high in the upper 30s. Glazed granular, transformed snow, PistenBully packed.

Glidewax: Apply HP Red Hot Wax, scrape and brush, lightly rub on Jet Bloc Red, polish with the Rotary Brush Merino Wool, repeat the Jet Bloc rub/polish for a second coat. Then quickly (about 2 to 3 seconds) spray [Jet Liquid](#) Red tail to tip, let sit for 10 minutes, go ski.

Gripwax: Roughen base with 150 grit sandpaper, apply Nordic Base Klister Green, heat and smooth. While still warm, apply Nordic Klister Red in a chevron pattern, smooth and let cool.

Structure: A Wet structure covered by one pass with the Yellow Structurite tool after scraping and brushing the final Hot Wax or polishing the Jet Powder/Bloc but before applying Jet Liquid will best suit these conditions.

Racing-Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Blue, Red or Yellow), as the temperature ranges are the same. For a more economical option, omit Jet topcoats. All Race Wax Tips recommend ONLY fluorine-free products. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
