

WAX RECOMMENDATION

TOKO[®]

Boulder Mountain Tour

Galena Lodge- 25 miles North of Ketchum, Idaho

Saturday, Feb. 6th

10 am start

34 km - freestyle

Wave starts

Point to Point Race

<http://bouldermountaintour.com>

Forecast/Conditions: Overnight low 12°, temperature at start 19°, temp at 12 pm, 29°. Cold, powder snow, mostly cloudy, 40% percent chance of new snow. Much of the BMT course is in the shade and the snow stays cold throughout most of the race, especially from Frostbike Flats to the finish (the last 7kms). Air temperatures may not reflect the cold snow on the course.

Glidewax: Apply LF Black, scrape and brush, then apply HF Blue, scrape and brush. Finish by crayoning JetStream Blue, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (20 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad. Later skiers may want to use HF Red/HF Blue mix 1:1, covered by JetStream Blue/Red. HelX 2.0 will also be a good option.

Structure: A fine linear structure covered by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

Racing - Service

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to www.TokoVideos.com.
