

WAX RECOMMENDATION

North Creek Festival

Gore Mountain, North Creek, NY

Saturday, December 17

9A.M.

5K Classic U16/18 Girls, Boys

10K Classic Open Men/Women

<https://www.skireg.com/ncnfsat>

Forecast/Conditions: Overnight low 10F, temperature at start 16. Manmade snow, frozen granular, with fresh powder mixed in. Cloudy with a 60 percent chance of new precipitation Friday evening through race start.

Glidewax: Apply LF Black, scrape and brush, followed by with HF Blue/HF Red mixed 1:1, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Cover with two layers of GripWax Red. Depending on temperature you might cover with one layer of GripWax Blue.

Structure: Universal grind with one pass of the Red Structurite tool before JetStream will best suit these conditions.

Created by Duncan Douglas, Toko Tech Team.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
