

# WAX RECOMMENDATION

## Ski Rodeo

Town Trailhead, Winthrop, WA

Wednesday, December 28

9 A.M. 1K, 9:30 A.M. 10K/5K

Skate

Mass start by distance

Single lap, except 10K possibly 2 laps

<http://methowvalleynordic.com>

**Forecast/Conditions:** Overnight low of 19, temperature at start near 22, light snow in the days leading up to the event. Partly sunny with a daytime high of 30. We should have a firm skate platform.

**Glidewax:** Apply LF Black, scrape and brush, then apply HF Blue/HF Red mixed 1/1, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

**Gripwax:** N/A

**Structure:** A universal structure covered by one pass with the Red Structurite tool (before JetStream application) will best suit these conditions.

Created by David Ford, Toko Tech Team member since 2003.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](http://TokoUS.com).
