WAX RECOMMENDATION

MSU Bobcat Christmas Pole

Bohart Ranch, Bozeman, MT
Saturday, December 10
10:30 A.M. 3K/1K Freestyle
11 A.M. 10K/5K Freestyle
Mass start
www.bohartranchxcski.com

Forecast/Conditions: Overnight low 16 with a 60 percent chance of snow. Snow likely Saturday with 1"-3" possible before noon. Temperature at start around 18. Expect packed powder conditions with new falling snow.

Glidewax: Apply LF Blue, scrape and brush, then apply HF Blue, scrape and brush. Finish by crayoning JetStream Blue, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3-4 layers of Nordic GripWax Red, corking between layers. If slightly colder than expected, apply 2 layers of Red covered by 2 layers of GripWax Blue.

Structure: A universal grind will best suit these conditions. If new snow falling and high humidity, cover grind with 1 pass with the Red Structurite tool before JetStream application.

Racing - Service

Check the Wax Tips page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
