## Skyway Skuffle

Skyway Trail System, Grand Mesa, CO

Saturday, December 31

11 A.M.

10K, Freestyle

Altitude 10,600 feet!

<http://gmnc.org/event/skyway-skuffle-10k/>

**Forecast/Conditions:** Overnight low 17, temperature at start 20, mostly cloudy, 30 percent chance of snow Friday night, less than 1 inch.

**Glidewax:** Apply LF Black, scrape and brush, then apply HF Blue/HF Red mixed 1/1, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

**Gripwax:** Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 2 layers of Nordic GripWax X-cold, corking between layers.

**Structure:** A universal grind covered by one pass with the Red Structurite tool before JetStream application will best suit these conditions

Created by Nelson Oldham, Toko Tech Team member since 1996.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](http://TokoUS.com).
