

WAX RECOMMENDATION

Skinny Santa Solstice Ski

Elk River Golf Club, Elk River, MN

Saturday, December 17

10 A.M.

10K Skate

Mass start, 5K lap

Forecast/Conditions: Five to nine inches of snow expected between noon on Friday and the early hours of Saturday morning. The temperature when the snowfall starts should be around 13 and steadily decrease to zero F at race time. As the snowfall tapers off the winds will pick up to 15 mph. We expect the snow to be cold and slow. The venue could change back to Woodland Hills but that decision will not be made until Friday evening.

Glidewax: Apply LF Blue, scrape and brush, then apply HF Blue, sprinkle on X-cold Powder, iron in together, scrape and brush. Finish by crayoning JetStream Blue, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Structure: A fine linear structure covered by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

Racing - Service

Check the [Wax Tips](#) page at [TokoUS.com](#) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](#).
