

WAX RECOMMENDATION

TOKO[®]

SmartWool Wasatch Citizen Series Race #1

White Pine Touring Center, Park City, UT - VENUE CHANGE!

Saturday, December 17

10A.M. (adult waves start at 10:20 A.M.)

10K, Classic technique

Wave starts. 2 laps of a 5K loop

More info [here](#)

Forecast/Conditions: Overnight low of 5F, temperature at start about 12, cloudy with possible light snow falling. Rain changing to snow forecasted for 36 hours prior to the race. Track may have new powder snow mixed with transformed icy snow.

Glidewax: Apply LF Black, scrape and brush, then apply HF Blue, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 2 layers of Nordic GripWax Blue, corking between layers. If the track is loose you can extend the kick wax pocket forward 1-2 inches for better grip. Consult the Toko easel at the start for updated gripwax recommendations.

Structure: A medium universal structure covered by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

Racing - Service

Check the [Wax Tips](#) page at [TokoUS.com](#) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](#).
