

WAX RECOMMENDATION

10th Mountain Division Biathlon

Auburn Ski Club, Soda Springs, CA

Sunday, January 15

10 A.M.

10K/7.5K/5K/2K, Freestyle

Interval start

Multiple laps

<http://auburnskiclub.org>

Forecast/Conditions: Lots of new snow and cool temperatures leading into the weekend. Sunday low of 19, race start 27, and high of 35. Partly cloudy. East winds should keep it skiing cold.

Glidewax: Apply LF Black, scrape and brush, then apply HF Blue/HF Red mixed 1/1, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: N/A

Structure: A fine linear structure covered by one pass with the Red Structurite tool (before JetStream application) will best suit these conditions.

Racing - Service

Created by Ben Grasseschi, Toko Tech Team member since 2003.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
