

WAX RECOMMENDATION

TOKO[®]

Mt. Hood Meadows Nordic Series

Mt. Hood Meadows Nordic Center, Mt. Hood, OR

Saturday, January 7

11 A.M.

10K Skate

Mass Start

<https://www.skihood.com/the-mountain/nordic-center>

Forecast/Conditions: Overnight low of 7F rising to 14 at the start. Snowfall forecast to begin at 10 A.M. Two or more inches possible by start of race. Expect to be skiing on freshly fallen snow over a firm base with continued snowfall during the race.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Structure: A universal structure covered by one pass with the Red Structurite tool (before JetStream application) will best suit these conditions.

Racing - Service

Created by Samuel Cordell, Toko Tech Team member since 2013.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
