

# WAX RECOMMENDATION

## Ski Haus Classic

Lake Catamount Touring Center, Steamboat Springs, CO

Sunday, January 15

10 A.M.

14K/7K/5K/2K Classic

Mass start

More info [Here](#)

**Forecast/Conditions:** Snow continuing in the mountains through Friday evening. It will dry out over the weekend making for excellent skiing conditions. Saturday night lows in the teens warming to the low 20s by race start with little to no wind.

**Glidewax:** Apply LF Black, scrape and brush, then apply HF Blue, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

**Gripwax:** Roughen base with 150 grit sandpaper, iron in a thin layer of Nordic Base Wax Green, cork smooth, let cool. Then apply 3-4 thin alternating layers of Nordic GripWax Blue and GripWax Red, corking between layers. Finish with a Blue layer.

**Structure:** A fine linear structure covered by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](http://TokoUS.com).
