## Mountain Shop Teacup Classic

Teacup Nordic Trails, Mt. Hood, OR

Sunday, January 22

10 A.M.

15K/5K/2K/1K, Classic

Mass start

<http://www.teacupnordic.org>

Forecast/Conditions: Overnight low of 29, 30 at start. New snow expected overnight with ongoing snowfall during race day.

Glidewax: Apply LF Black, scrape and brush, then apply HF Yellow, scrape and brush. Finish by crayoning JetStream Yellow, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 2 layers of Nordic GripWax Yellow, corking between layers. Add layers for more kick if desired.

Structure: A universal linear structure covered by one pass with the Red Structurite tool (before JetStream application) will best suit these conditions.

Created by Samuel Cordell, Toko Tech Team member since 2013. (optional email)@TokoUS.com

Check the [Wax Tips](#) page at [TokoUS.com](#) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](#).
