

WAX RECOMMENDATION

SmartWool Wasatch Citizen Series Race #2

White Pine Touring Center, Park City, UT

Saturday, January 7

10 A.M. (Adult waves start at 10:20 A.M.)

15K Skate technique

Wave start, 3 laps on a 5K loop

More info [here](#)

Forecast/Conditions: Overnight low about 3F, temperature at the start in the low teens, and cloudy skies. The forecast calls for several inches of new snow during the 2 days prior to the race so the snow should be clean and the track may be a little soft.

Glidewax: Apply LF Black/LF Blue mixed 1:1, scrape and brush, then apply HF Blue, scrape and brush. Finish by crayoning JetStream Blue, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: NA

Structure: A fine linear or fine universal structure covered by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

Racing - Service

Check the [Wax Tips](#) page at [TokoUS.com](#) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](#).
