

WAX RECOMMENDATION

TOKO[®]

Sun Valley IMD JNQ

Lake Creek Trails, north of Ketchum, ID

Saturday, January 21

10 A.M. Qualifiers, Heats to follow

Classic

<http://intermountainxc.com/events/sun-valley-jnq2>

Forecast/Conditions: Overnight low 16 with some wind and new falling snow. Expect flurries during race.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in a hair-thin layer of Nordic Base Wax Green, cork smooth, let cool. Anticipated kick wax will be Blue early and then Blue covering Red and then later perhaps straight Red kick wax. Cork between layers for a smooth finish.

Structure: A fine linear structure covered by one pass with the Blue Structurite tool (before JetStream application) will suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
