

WAX RECOMMENDATION

Methow Valley Nordic Festival & Pursuit

Mazama Community Center to Winthrop, WA

Saturday, January 21

9:30 A.M.

30K Skate or optional 10K untimed

Mass start

Point to Point

<http://methowtrails.org>

Forecast/Conditions: New snow arriving daily since Tuesday. Friday night low of 16 with a chance of light snow during the event. Edges of trail could be soft. Temperature could rise to around 22 by the finish.

Glidewax: Apply LF Black, scrape and brush, then apply HF Blue/HF Red mixed 1/1, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: N/A

Structure: A fine linear or universal structure covered by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

Racing - Service

Created by David Ford, Toko Tech Team member since 2003.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
