

WAX RECOMMENDATION

Stagecoach Classic

Devil's Thumb Ranch, Tabernash, CO

Saturday, January 21

9 A.M. 30K Classic, 10:30 A.M. 15K Classic

Mass starts, Point to point

More info [Here](#)

Forecast/Conditions: Forecast calls for a slight chance of snow Friday night with an overnight low of 12 warming to the mid-teens for the 9 A.M. start under mostly cloudy conditions. The actual air temperature at Devil's Thumb tends to be ~10 degrees colder than forecasted.

Glidewax: Apply LF Blue, scrape and brush, then apply HF Blue scrape and brush. Finish by crayoning JetStream Blue, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 4-5 layers of Nordic GripWax Blue, corking between layers. Late wave starters will want to use GripWax Red covered with a layer of GripWax Blue.

Structure: A fine linear structure covered by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
