550m, 900m + 1.3K for U16 and older, Skate

Wave start

Single lap

<http://www.methowvalleynordic.com>

Forecast/Conditions: Good chance of light snowfall at times from Friday through Sunday. Low of 18 Friday night. Snow temperature 25 to 30 for all races. Cloudy skies with potential passing snow showers. Mostly transformed with new snow mix.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red/HF Yellow mixed 1/1, scrape and brush. Finish by crayoning JetStream Yellow, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad. HF and JetStream for U16 and older only. No HF or topcoats for U14 and younger.

Gripwax: NA

Structure: A medium linear structure covered by one pass with the Red Structurite tool (before JetStream application) will best suit these conditions.

Created by David Ford, Toko Tech Team member since 2003.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
