12.2K Women, 15K Men

Mass start

See website for details

<http://www.wabiathlon.org>

Forecast/Conditions: Daily snowfall for the past week including a fair amount Friday leading to potentially punchy climbs. Stiffer flexed skis could be a wise choice. Overnight low of 24. Snow temperature expected close to 28 under cloudy skies .

Glidewax: Apply LF Black, scrape and brush, then apply HF Yellow, scrape and brush. Finish by crayoning JetStream Yellow, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: NA

Structure: A universal structure covered by one pass with the Yellow Structurite tool followed by 1 pass with the Red Structurite tool. (before JetStream application) will best suit these conditions.

Created by David Ford, Toko Tech Team member since 2003.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
