Stevens Pass Nordic Center. Stevens Pass, WA

Saturday, February 25

10:30 A.M. Zeroing, 11:30 A.M. Race

7.5K Women, 10K Men

Pursuit format

<http://www.wabiathlon.org>

Forecast/Conditions: Friday night low near 15 rising to 31 as the daytime high Saturday under partly cloudy skies. Conditions should be firm and fast on a transformed snowpack. Snow temperature at race time should be near 20 with a minor chance of slight dusting of snow Friday or Friday night.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red/HF Blue mixed 1/1, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: NA

Structure: A fine to medium linear structure covered by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

Created by David Ford, Toko Tech Team member since 2003.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
