Sunday, February 26

10:30 A.M. Zeroing, 11:30 A.M. Race

12.5K Women, 15K Men

Individual start. See Website for details.

<http://www.wabiathlon.org>

Forecast/Conditions: Conditions are predicted as of Thursday A.M. to be similar to Saturday with maybe a slightly higher amount of cloud cover. Saturday night low of 17 with race time snow temperature around 20. Firm and fast on a transformed snow pack.

Glidewax: Apply LF Black, scrape and brush, then apply HF Blue/HF Red mixed 1/1. Straight HF Blue also will be a fast and a safe choice as well, especially if the temperature dips as low as predicted on Friday and Saturday night. Scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: NA

Structure: A fine to medium linear structure covered by one pass with the Red Structurite tool (before JetStream application) will best suit these conditions.

Created by David Ford, Toko Tech Team member since 2003.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
