

WAX RECOMMENDATION

Meijer State Games of Michigan

Hanson Hills Recreation Area, Grayling, MI

Sunday, February 19

10 A.M. 12K Classic

15 second interval start

NordicSkiRacer.com

Forecast/Conditions: Overnight low of 28 at 6 A.M. rising to 42 at 11 A.M. Expect mostly sunny skies with little chance of precipitation.

Glidewax: Apply LF Black, scrape and brush, then apply HF Yellow, scrape and brush. Finish by crayoning JetStream Yellow, iron hot (356F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, heat in Nordic Base Klister Green, smooth, let cool. Then heat in a smooth layer of Nordic Klister Yellow, smooth, let cool. If using skin skis, see our [skin treatment options](#) for best results.

Structure: A Universal structure covered by one pass with the Yellow Structurite tool (before JetStream application) will best suit these conditions.

Created by Nick Baic, Toko Tech Team member since 2007.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
