Forecast/Conditions: Overnight low of 29 at 7 A.M. rising to 40 at 11 A.M. Expect partly sunny skies with little chance of precipitation.

Glidewax: Apply LF Black, scrape and brush, then apply HF Yellow, scrape and brush. Finish by spraying an even layer of HelX 2.0 Yellow, let dry and ski. Do not brush or polish.

Gripwax: NA

Structure: A Universal structure covered by one pass with the Yellow Structurite tool (before HelX application) will best suit these conditions.

Check the [Wax Tips](http://TokoUS.com) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
