

# WAX RECOMMENDATION

## White Pine Stampede

Shanty Creek Resort, Mancelona, MI

Saturday, February 4

10:30 A.M. 20K Classic, 10:45 A.M. 20K Skate

11:30 A.M. 10K Skate and Classic

<http://whitepinestampede.org>

Forecast/Conditions: Overnight low of 12 at 7 A.M. rising to 24 at 2 P.M. Expect a hard pack trail of manmade snow.

Glidewax: Apply LF Black, scrape and brush, then apply HF Blue, scrape and brush. Finish by crayoning JetStream Blue, iron hot (356F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 4 layers of Nordic GripWax Blue. If more kick is needed, alternate layers of Red and Blue with Blue being the last layer.

Structure: A fine linear structure covered by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

Created by Nick Baic, Toko Tech Team member since 2007.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](http://TokoUS.com).
