Tamarack Lodge XC, Mammoth Lakes, CA

Sunday, February 5

10 A.M.

20K/10K/5K Classic only

Mass start

Multiple loops

<http://tamaracklodge.com>

Forecast/Conditions: Light snow coming in early on Saturday, turning clear on Saturday evening. Then mostly cloudy Sunday with low of 21, race start 28 and high of 32. Light winds.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. The kick wax will probably be 3-4 layers of Nordic GripWax Blue/Red alternating, and corking, between layers. Finish with Nordic GripWax Red.

Structure: A universal wet structure covered by one pass with the Red Structurite tool (before JetStream application) will best suit these conditions.

Racing - Service

Created by Ben Grasseschi, Toko Tech Team member since 2003.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
