

WAX RECOMMENDATION

TOKO[®]

Carnival Classic

Glacier Nordic Center, Whitefish, MT

Sunday, February 5

9 A.M. 12K, 10:30 A.M. 4K/1K

All races are Classic technique

Mass start format

www.glaciernordicclub.com

Forecast/Conditions: Friday night 1"-3" snow likely with low around 16. Temperature at start around 20. Snow likely with 1"-3" expected during the day.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3-4 layers of Nordic GripWax Red, corking between layers. If snow is fairly dry, a thin layer of GripWax Blue over the GripWax Red may be effective.

Structure: A universal grind covered by one pass with the Red Structurite tool before JetStream application will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
