10:30 A.M. 22.5K/15K Skate

All on 1K loop of manmade snow

<http://www.winter-fest.com/event/ice-age-challenge/>

Forecast/Conditions: Friday afternoon high in the mid-50s, mostly sunny skies. Friday night low in the mid-30s. Temperature at the start of the races in the mid- to upper 40s with mostly sunny skies.

Glidewax: Apply LF Black, scrape and brush, then apply HF Black/HF Yellow mixed 1:1, scrape and brush. Finish by crayoning JetStream Yellow, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: N/A

Structure: A universal grind covered by one pass with the Yellow Structurite tool (before JetStream application) will best suit these conditions.

Created by Ben Lund, Toko Tech Team member since 1999.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
