

WAX RECOMMENDATION

Montana Senior Olympics

Bohart Ranch Nordic Center, Bozeman, MT

Saturday, February 18

10 A.M. Classic, 1 P.M. Skate

10K/5K

Mass start on 5K course

www.bohartranchxcski.com

Forecast/Conditions: Overnight mostly cloudy with low around 25. Temperature at 10 A.M. around 35 and near 40 at 1 P.M. with a slight chance of snow. Expect transformed trail conditions.

Glidewax: Apply LF Black, scrape and brush, then apply HF Black, scrape and brush. Finish by crayoning JetStream Yellow, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Tracks will most likely be very transformed snow with klister conditions. Roughen base with 150 grit sandpaper, iron in Nordic Base Klister Green, smooth, let cool. Check at the Toko tent for updated grip wax recommendation.

Structure: A universal grind covered by two passes with the Red Structurite tool (before JetStream application) will best suit these conditions. An additional light pass with the Yellow Structurite tool is recommended for the afternoon skate race.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
